# BULLOCH TIMES.

ESTABLISHED 1892.  
PUBLISHED WEEKLY BY THE  
BULLOCH TIMES PUBLISHING COMPANY.  
D. B. TURNER, Editor and Manager.  
Subscription, \$1.00 PER YEAR.  
Entered as second-class matter March 23, 1905, at the post office at Statesboro, Ga., under the Act of Congress of October 3, 1917.  
WEDNESDAY, FEB. 20, 1907.  
Need for Immigration.  
(Savannah Press.)

One of the best addresses made before the cotton growers in Statesboro last Monday was by Hon. A. M. Deal, who advanced the idea that farmers are seriously interested in inducing a desirable class of foreign immigrants to come here. It has been supposed that the main opposition to immigrants came from farmers; but Mr. Deal insists that in the country the labor problem is growing more serious. The thing needed to develop the country is an industrious citizenry—people who will not lie up in their houses—content to live off meager earnings, unproductive and listless. Thrifty laborers from abroad would mean that every adult would work. Intelligent white labor would produce more pounds of lint cotton per working hand.

The BULLOCH TIMES coincides with Mr. Deal's idea. When the demand for immigrants seizes upon the country as it already has upon the city, there will be no doubt that something will be done, for the legislature may be induced to make an appropriation and the farmers will join hands with the manufacturers. In this connection the coming immigration meeting at Macon will be full of interest. It will be held on Tuesday, the 19th of February. The indications are that a very large attendance—something over four hundred business men—will be present as delegates. Of course this number includes a number of agriculturalists. The promoters of the meeting have received acceptance from the mayors of thirty cities.

It is hoped that the deliberations will not only prove interesting, but that we will inaugurate a movement at this conference which will mean more to the state of Georgia than any other one thing attempted lately. The press all over the state is interested. The speakers are the best informed men on this and kindred subjects in America. Commissioner Watchorn being the dean of the immigration department and Mr. M. V. Richards one of the most experienced workers in America. The state conditions will be ably depicted by the Georgia speakers.

The smoker will be exceedingly instructive as every man will have the opportunity to tell about conditions in his section, and the speakers at the smoker will not only be active business men, but men who are giving this subject careful study.

It is a question whether it would not be easier to write a new constitution instead of revising it to the extent that some of its friends and enemies want done.

The food trust magnates all over the country have discovered that the pure food law is not such a bad thing, since it gives them a fine excuse for raising prices.

As the case now stands, probably Admiral Rojevsky and Nebogoff wish they had gotten their sentences before they had to run the risk of meeting the Japanese.

The munificence of Mr. Rockefeller's recent educational donation makes it appear to some people that the iniquity of the Standard Oil company was even deeper than fancied.

Now that this country is preparing to pan gold out of the Panama canal cut, the French bond holders are wondering whether they did us so completely on the sale of their franchise.

It is not believed that the night bank will be any great boon to the man who wants to deposit money,

but it doubtless will be a fatal convenience to the man who wants to draw it out.

A number of the leading English journals have sent special correspondents to the Thaw trial so as not to miss any of the disgusting details that they are anxious to lecture us about.

A Washington paper says the president admits that Mr. Hanks was the only man who ever "put him out." It will be noted that this does not include Mrs. Storer, who managed to do something in that line.

An esteemed contemporary has the word of a scientist for it that no man is in perfect health who ever wants a drink. And this agrees perfectly with the statement of another paper, that not one man in 10,000 enjoys perfect health.

WANTS STATE ROAD.  
Smith Would Have One From Chicago to Savannah.

CHICAGO, Feb. 16.—A proposition to establish a state owned railroad from Chicago to Savannah has been suggested to Corporation Counsel James Hamilton Lewis by Governor-elect Hoke Smith of Georgia in a letter he received. The letter says:

"I am much interested in railroad rates from the Lakes to Georgia. Our state owns a railroad from Atlanta to Chattanooga, and there is a strong sentiment in favor of extending it to Savannah.

"If Cincinnati could reclaim control of the line built by its citizens from Cincinnati to Chicago, and Cincinnati and Chicago would join in a movement for the construction of a line from Cincinnati to Chattanooga, there might be made a through trunk line from Chicago to Savannah, operated solely for the purpose of paying expenses and interest on the actual cost of construction without the burdens of watered stocks and bonds.

"Such a line would prove beneficial not only to great cities through which it passed, but to the broad territory adjacent to the line. It would reduce freight rates more than twenty-five per cent. It would have a most marked influence in our trade with other nations."

Wanted.  
1,000 bushels of corn, either in the ear or shelled. Will pay cash for same. OLLIFF & SMITH.

FIRE AT SWAINSBORO.  
Loss is Estimated at \$75,000.—TO Be Rebuilt at Once.

SWAINSBORO, Ga., Feb. 17.—Swainsboro was visited last night by the most disastrous fire in its history. At 11:45 o'clock fire was discovered in the dry goods store of Joseph Ehrlich. It had gained such headway that it was impossible to stop its spread and the Mason & Clark skating rink, a wooden building, was soon in flames. The Mason Drug Company's store caught next and was quickly burned. The two-story brick building, known as the McLeod building, occupied by Heath, Giddens & Co., although said to be one of the best constructed buildings in this section, soon gave way and is a total loss.

The wind was blowing from a southerly direction and it was thought for a while that the entire business section of the town would be swept away. The building occupied by the Olliff-Coleman Company was directly in the path of the flames, and it was only by heroic efforts that it was saved.

The nearest estimate that can be made at this time as to the loss sustained is \$75,000, although it is possible that it may be more. The loss is only partially covered by insurance. The nearest estimate of the amount carried by the losers is \$30,000.

The second story of the McLeod building was used for office purposes exclusively, and the loss sustained there will easily amount to \$10,000.

There is no telegraph office in Swainsboro, and on account of the damage to the telephone wires, it was impossible to secure communication with the outside world. It

is hoped that the telephone company will be in readiness for business tomorrow.

It is understood that arrangements have already been made whereby handsome brick buildings will take the place of those burned. The origin of the fire is unknown, but it is supposed to have been incendiary.

Feed! Feed!  
In large or small quantities—by the sack, ton, or otherwise—always for sale. OLLIFF & SMITH.

How I Kept House One Day.  
(Composition by a school girl.)

(a.) Why I was keeping house.  
(b.) The morning work.  
(c.) The evening work.

On Friday afternoon late, a telegram came to my mother that her father was very ill and that she must go as quickly as possible; so next morning she left on the five o'clock train. The last words she told me before saying good-bye was to be a good girl and see to the cleaning of the house, the cooking of dinner, and also to the preparing of Sunday dinner (for we always prepare our Sunday dinners on Saturday).

The cook happened to be in a good humor that day (I guess it was getting up so early and being in the fresh air for the first time in six months) and decided she would be as smart as I thought I would. We cleaned up the house well, dusted and swept every room and were through soon enough to have dinner on time, and of course being the over-seer myself, I wanted to have something better than we usually have in the week days. So I got my mother's cook book and looked the pie and cake department through and soon found something that suited my appetite exactly. When my father and brother came in and ate their dinner they declared they had not had as good dinner in the week days since the governor was at our house, but of course they exaggerated because it was I.

In the afternoon my work was not so hard, for the cook knew more about preparing the Sunday dinner than I did; so I just let her have the kitchen to herself, and I went into the house to read, but just as I sat down some of my mother's best company came in. At first I was a little embarrassed, but that did not last long. Putting on my best company manners I went into the drawing room and started off entertaining them by playing two or three of my best pieces on the piano. Afterwards I was so interested in their conversation about their societies and other affairs of grown folks, I thought I was a little woman sitting there talking to them, and did not realize the fact that I was not until they started to leave and told me how sorry they were that my mother was away, but as far as entertaining them went, they had not spent a more enjoyable evening anywhere than they had that afternoon, and that my mother would be "tickled to death" to know what a good society lady and house keeper I was going to make.

You can get better clothing for your money at Kennedy's.

My cabbage plants, consisting of all the latest varieties, are now ready for the market. Those desiring plants for winter and spring planting can get them from me now. I have just a good deal of time and attention to the growing of these plants and they are the best to be had on the market anywhere. They are suited for this soil and climate and are better in every way than those coming from a long distance, and my prices are as low as I can afford to make them. When people of this section want plants they will do well to get my prices.

J. B. ILER,

My cabbage plants, consisting of all the latest varieties, are now ready for the market. Those desiring plants for winter and spring planting can get them from me now. I have just a good deal of time and attention to the growing of these plants and they are the best to be had on the market anywhere. They are suited for this soil and climate and are better in every way than those coming from a long distance, and my prices are as low as I can afford to make them. When people of this section want plants they will do well to get my prices.
